

School App Authentication Instructions

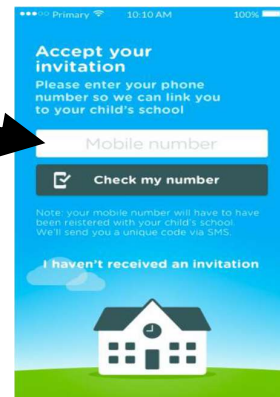

All parents who have downloaded the School App are currently Guest Users where everyone receives all of the messages.

We are now moving to give all our parents authenticated access and you will shortly receive an invitation to do this. This will allow us to send private messages to classes, groups and individuals.

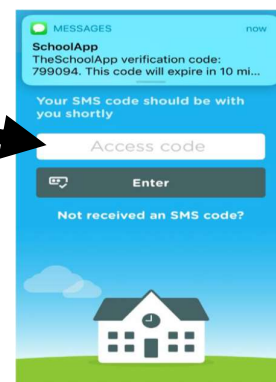

We would ask all parents to please follow these instructions when you get a text from the SchoolApp telling you that school has given you access to receive private app messages.

1. Firstly you must click on the link provided in the text.

2. Type in your Mobile Number and Click **Check my number**

3. You will then receive another text from the SchoolApp with a 6 digit verification code. Type the code into the box and press Enter. **This must be done within 10 minutes before the code expires.**

You are now set up as an authenticated user for the Ballyoran Primary School App and you will be able to enjoy the full benefits of the App
